### **Topics Discussed and Decisions Made:**

Based on work divided as following last week:

- Activity/Swimlane Diagrams → Eni & Fabjan
- State Chart Diagrams → Enejda
- Sequence Diagrams → Keli & Sardi
- Collaboration Diagrams → Klintist

This week meeting was a short meeting to review and ask for advice regarding how to correct the diagrams so far. We shared once more what was discussed with the professor on our latest reporting to him on how to improve our respective works and logically connect the diagrams together.

Due to the reason that time is scarce to a graduate student, no further work was assigned as each of us needed more time to process and finish other demands required of them.

### **Time, Place, and Agenda for Next Meeting:**

The time and place will probably be the same, meaning online with camera and speaker on the Google meet platform starting around 6:00 or 6:30 p.m. on the upcoming Monday. The agenda will be to discuss and do the rest of the diagrams to be done and as such to finalize the design schema of the project as a whole.
