

MEETING REPORT No. 07

Team Name: SmartStyle

Date of Meeting: 09 May 2020

Start Time: 11:00 a.m.

End Time: 01:30 p.m.

Meeting Location: Online

Moderator: Keli Kasharaj

Recorder: Enejda Doko

Other Members Present: Eni Fejzo, Fabjan Kodra, Klintist Dyrmishi, Sardi Shehu

Members Absent: No one

Tasks Assigned:

Different from other weeks, we scheduled this meeting on a Sunday, so we could have the weekend in front of us to finish most of the diagrams. Seeing how we had focused mostly on making the Use Case boxes based on each individual user, we thought a common framework with adequate codification would be more beneficial and easier to construct the diagrams upon. Together we went through each one of the use cases, explaining in theory what each of them should do and how the steps would be in order to be clearer regarding the system idea as a whole and regarding the important details associated to it.

Topics Discussed and Decisions Made:

It was decided that each of us would take a type of diagram and by the next Lab hour which is on 14th of May, we could present a synthetic framework of how we have understood each diagrams inside the Behavioral cluster provided by the professor. The work was divided as follows:

- Activity/Swimlane Diagrams → Eni & Fabjan
- State Chart Diagrams → Enejda
- Sequence Diagrams → Keli & Sardi
- Collaboration Diagrams → Klintist

Everything will be worked this week and directly uploaded on GitHub so each member can view and point out errors on other's diagrams, or even to take them as direction so that the work can flow on the same direction.

Time, Place, and Agenda for Next Meeting:

The time and place will probably be the same, meaning online with camera and speaker on the Google meet platform starting around 6:00 or 6:30 p.m. on the upcoming Monday. The agenda will be to discuss and do the rest of the diagrams to be done for the project, such as ERD, DFD, Objects, Class Diagram, and so on.
